TITLE IX

COMPLIANCE AND EQUITY IN ATHLETICS

PRESENTERS:
Mike Quinn – CMAA   Lakewood School District, MI
Zac Stevenson – CMAA   Lakeview School District, MI
In This Session

FREQUENTLY ASKED QUESTIONS

- Do We Have Equipment Concerns?
- Do We Have Facilities Concerns?
- Do We Have Equity in our Sports Information?
- How Do We Approach DH & Prime-Night Scheduling?
- What Are The Rules Surrounding: Booster Club $  Donor $  Fundraising $  Sponsor $?
- Do We Have Equity in Salaries and Satisfy The FLSA?
- Do We Have Transgender Policies?
In This Session

**Equity in Athletics**

*PLAINGFAIR*

- Protective athletic equipment & athletic supplies
- Locker rooms and practice/competition facilities
- Allocation of travel/transportation/per diem benefits
- Years of experience, quality & salaries of coaches
- Institutional housing/dining facilities & services
- Nature of publicity, marketing & media services
- Game/practice times & scheduling
- Facilities for & access to training & medical services
- Academic tutoring services for student-athletes
- Institutional support services for athletic programs
- Recruiting resources provided to athletic programs
Roster management techniques (eliminating teams or limiting squad size) are disfavored methods of compliance. Nothing in Title IX requires elimination of teams or limits on squad size.

Private sponsorship of teams is permissible under Title IX (booster clubs, donors, fundraising, sponsors), but such sponsorship does not mitigate the duty of schools to comply with Title IX.
P: PROTECTIVE ATHLETIC EQUIPMENT, UNIFORMS, & OTHER SUPPLIES

COMPLIANCE FACTORS

◊ Quality Of Athletic Equipment
  - Equal vs Equitable

◊ Amount Of Athletic Equipment
  - 1-to-1 vs $-for-$

◊ Maintenance Of Athletic Equipment
  - Repair, Replacement and Annual Reconditioning

◊ Availability Of Athletic Equipment
  - Resources and Opportunities
L: LOCKER ROOMS & PRACTICE/COMPETITION FACILITIES & PLAYING FIELDS

COMPLIANCE FACTORS

- Quality & Availability Of Facilities
- Exclusivity Of Use Of Facilities
- Event Preparation In Facilities
- Maintenance & Repair Of Facilities
- Locker Room Quality
- Locker Room Availability
COMPLIANT?
F: FACILITIES FOR & ACCESS TO ATHLETIC TRAINING & MEDICAL SERVICES

COMPLIANCE FACTORS

- Availability Of Medical Personnel
- Availability Of Athletic Trainers
- Availability Of Weight/Training Facilities
- Availability Of Conditioning Facilities
- Booster $$
Baseball bleachers taken down after ruling that girls softball team's seats must be equal

High School Policies

The below listed policies are high school policies set by the state's high school athletics association. They are not necessarily reflective of middle school policies, but many states follow the high school policies if they do not have their own. Middle school policies are more difficult to track, but will be added as we learn of them.

**TRANS* ATHLETE**

High School Policies for Transgender Student Athletes

- **Green**: Inclusive—no medical hormones or surgery required
- **Yellow**: Needs modification, case-by-case or individual review
- **Red**: Discriminatory—requires birth certificate or surgery & hormone wait period
- **Blue**: No policy
TITLE IX COMPLIANCE AND EQUITY IN ATHLETICS

Thoughts and Discussion?
TITLE IX COMPLIANCE AND EQUITY IN ATHLETICS

Contact Information:

Mike Quinn – CMAA  Lakewood School District, MI
mikequinn@lakewoodps.org

Zac Stevenson – CMAA  Lakeview School District, MI
zstevenson@lakeviewspartans.org
As a core value, the NCAA believes in and is committed to diversity, inclusion and gender equity among its student-athletes, coaches and administrators. We seek to establish and maintain an inclusive culture that fosters equitable participation for student-athletes and career opportunities for coaches and administrators from diverse backgrounds. Diversity and inclusion improve the learning environment for all student-athletes and enhance excellence within the Association.

The Office of Inclusion will provide or enable programming and education, which sustains foundations of a diverse and inclusive culture across dimensions of diversity including, but not limited to age, race, sex, national origin, class, creed, educational background, disability, gender expression, geographical location, income, marital status, parental status, sexual orientation and work experiences.

Adopted by the NCAA Executive Committee, April 2010

The purpose of this resource is to provide guidance to NCAA athletic programs about how to ensure transgender student-athletes fair, respectful, and legal access to collegiate sports teams based on current medical and legal knowledge. It provides best practice and policy recommendations for intercollegiate athletic programs to provide transgender student-athletes with fair and equal opportunities to participate. In addition to specific policy recommendations for college athletics, the resource provides guidance for implementing these policies to ensure the safety, privacy, and dignity of transgender student-athletes as well as their teammates. Specific best practice recommendations are provided for athletic administrators, coaches, student-athletes and the media.

Helen Carroll, Director of the National Center for Lesbian Rights (NCLR) Sports Project www.nclrights.org, former NCAA/NAIA basketball coach and collegiate athletic director at University of North Carolina Asheville and Mills College of Oakland, Ca.

Providing medical advice and understanding of the complexities of the transitioning student-athlete are: Eric Vilain, M.D., Ph.D., Professor of Human Genetics, Pediatrics and Urology, Director of the Center for Gender-Based Biology and Chief of Medical Genetics in the UCLA Department of Pediatrics, member of the International Olympic Committee medical advisory board; R. Nick Gorton, M.D., Emergency Medicine Physician, Sutter Davis Hospital, Primary Care Provider, Lyon- Martin Women’s Health Services–San Francisco, Medical-Legal Consultant for transgender health care for Lambda Legal, the Transgender Law Center, the Northwest Justice Project, the New York Legal Aid Society, National Center for Lesbian Rights Sports Project and the Sylvia Rivera Law Project; Lori Kohler, M.D., Medical Director of the Family Health Center at San Francisco General Hospital.

Providing review related to the legal rights of transgender student-athletes in the context of the broader legal status of transgender rights in the United States: Lambda Legal; American Civil Liberties Union; Transgender Law Center; National Center for Transgender Equality; Gay and Lesbian Advocates and Defenders; National Center for Lesbian Rights.

Providing expertise regarding National Collegiate Athletic Association rules, regulations and procedures related to drug testing, eligibility requirements, and gender equity: Karen Morrison, Director for Gender Inclusion Initiatives; Mary Wilfert, Associate Director, Health and Safety.

INTRODUCTION

What Does Transgender Mean?

“Transgender” describes an individual whose gender identity (one’s internal psychological identification as a boy/man or girl/woman) does not match the person’s sex at birth. For example, a male-to-female (MTF) transgender person is someone who was born with a male body, but who identifies as a girl or a woman. A female-to-male (FTM) transgender person is someone who was born with a female body, but who identifies as a boy or a man.1

It is important that all people recognize and respect the transgender person’s identification as a man or a woman. In order to feel comfortable and to express their gender identity, transgender people may take a variety of steps: changing their names and self-referencing pronouns to better match their gender identity; choosing clothes, hairstyles, or other aspects of self-presentation that reflect their gender identity; and generally living, and presenting themselves to others, consistently with their gender identity. Some, but not all, transgender people take hormones or undergo surgical procedures to change their bodies to better reflect their gender identity.

Some people are confused by the difference between transgender people and people who have intersex conditions. The key feature of being transgender is having a psychological identification as a man or a woman that differs from the person’s sex at birth. Apart from having a gender identity that is different than their bodies, transgender people are not born with physical characteristics that distinguish them from others. In contrast, people with intersex conditions (which may also be called a “Disorders of Sex Development”), are born with physically mixed or atypical bodies with respect to sexual characteristics such as chromosomes, internal reproductive organs and genitalia, and external genitalia.2

An increasing number of high school- and college-aged young people are identifying as transgender (or trans), meaning that their internal sense of their gender identity is different from the gender they were assigned at birth. These students challenge educators to rethink an understanding of gender as universally fixed at birth. Educators must be open to this challenge to create educational institutions that value and meet the needs of all students. Once we recognize that transgender young people are part of school communities across the United States, educational leaders have a responsibility to ensure that these students have access to equal opportunities in all academic and extracurricular activities in a safe and respectful school environment.

For a more complete list of definitions and terms related to transgender people, refer to Appendix A.

STEPHANIE BRILL
Executive Director, Gender Spectrum

“There are more and more transgender children today who, even at young ages, are allowed to live their lives in alignment with who they are. As it becomes common medical procedure to allow these children to transition in childhood, athletic policies need to reflect this change in the landscape of student-athletes.”
Athletics programs are widely accepted as integral parts of the college experience. The benefits of athletics participation include many positive effects on physical, social, and emotional well-being. Playing sports can provide student-athletes with important lessons about self-discipline, teamwork, success, and failure—as well as the joy and shared excitement that being a member of a sports team can bring.

For some students, playing on collegiate sports teams leads to future careers in athletics as competitors, coaches, administrators, and athletic trainers. All students, including those who are transgender, deserve access to these benefits.

Though the needs of transgender college students have received some attention in recent years, this issue has not been adequately addressed in the context of athletics. Few collegiate athletics programs, administrators, or coaches have been prepared to fairly, systematically, and effectively address a transgender student’s interest in participating in athletics. The majority of intercollegiate athletics programs have no policy governing the inclusion of transgender student-athletes, and most coaches have not received any direction for accommodating a transgender student who wants to play on a sports team. In fact, most intercollegiate athletics programs have not received the information to address even basic accommodations such as knowing what pronouns or names to use when referring to a transgender student, where a transgender student should change clothes for practice or competition, or what bathroom or shower that student should use.

The best practices and recommended policies within this resource will provide athletics administrators and others involved in intercollegiate athletics with the information and tools to support participation of transgender student-athletes and create environments that respect students from all backgrounds.
Overview

This section provides an overview of issues related to providing participation opportunities for transgender student-athletes by addressing the following questions:

- Why must we address transgender issues in athletics?
- Why focus on college athletics?
- Should the participation of transgender student-athletes raise concerns about competitive equity?
- What are the benefits of adopting fair and inclusive policies?

Why Must We Address Transgender Issues in Collegiate Athletics Programs?

Educators must address transgender issues in athletics for several reasons. First and foremost, core values of equal opportunity and inclusion demand that educational leaders adopt thoughtful and effective policies that enable all students to participate fully in intercollegiate athletics programs. Over the course of many years, schools have learned and continue to appreciate the value and necessity of accommodating the sport participation interests of students of color, women, students with disabilities, and lesbian, gay, and bisexual students. These are all issues of basic fairness and equity that demand the expansion of our thinking about equal opportunity in sports. The right of transgender students to participate in sports calls for similar considerations of fairness and equal access.

Additionally, as more states, localities, and schools add gender identity and expression to their non-discrimination policies, and as more courts hold that sex discrimination laws protect transgender people, transgender students and their parents are increasingly empowered to insist that athletics programs accommodate transgender students (see Part Four: Appendix C for a compilation of state and federal laws, regulations, and legal decisions prohibiting discrimination based on gender identity/expression). To avoid decision-making that perpetuates discrimination, school leaders must be proactive in adopting policies that are consistent with school non-discrimination policies and state and federal laws prohibiting discrimination based on gender identity or expression (see Appendix A for definitions of gender identity and gender expression).

Though the number of transgender students is small, research indicates that their number is growing. As the number of people who come out as transgender as teenagers and children increases, so too do the numbers of parents who support their transgender children and advocate for their rights to safety and fair treatment. In response to these demands, college leaders must be prepared to accommodate the educational needs and protect the rights of transgender students.

To respond to these realities, athletics conferences and individual universities/colleges are well advised to proactively adopt policies and best practices that provide equal opportunities for transgender students to participate on sports teams. Moreover, in the spirit of encouraging sports participation for all, it is the right thing to do.

In order to design effective policies, educators must understand that gender is a core part of everyone’s identity and that gender is more complex than our society generally acknowledges. Learning about the experience of transgender people can help us to see more clearly how gender affects all of our lives, and to put that knowledge into practice in order to better serve all students.

Addressing the needs of transgender students is an important emerging equal opportunity issue that must be taken seriously by school leaders. Because a more complex understanding of gender may be new and
challenging for some people, there is a danger that misinformation and stereotypes rather than accurate and up-to-date information will guide policy decisions. Campus and athletics administrators who are charged with policy development need guidance to avoid including misconceptions and misinformation in policies that, ultimately, create more problems than they solve.

Lea Robinson
Associate Director, Office of Multicultural Affairs, Columbia University
American Association of University Women (AAUW)
(former coach and athlete)

“During my coaching career, there was little discussion of the existence of transgender student-athletes and few resources for those student-athletes that did identify as transgender.

In my own experience, the few students that I did suspect may have identified as transgender weren’t really able to come out in those settings because of a lack of support within their athletic communities as well as a real lack of resources, education, and safe spaces.

I believe that the implementation of supportive policies would signify a commitment to the support and acceptance of transgender-identified student-athletes and coaches, and aid in creating more spaces for dialogue and education within the culture of athletics regarding issues and challenges facing transgender student-athletes.

Those policies will also give transgender student-athletes and coaches the guidance, support, encouragement, and sense of safety they need to pursue what can sometimes be a very difficult journey.”

Why Focus on College Athletics?

Providing equal opportunities in all aspects of school programming is a core value in education. As an integral part of higher educational institutions, college athletics programs are responsible and accountable for reflecting the goals and values of the educational institutions of which they are a part. It follows that athletics programs must reflect the value of equal opportunity in all policies and practices.

A core purpose of college is to teach students how to participate and be good citizens in an increasingly diverse society and how to interact respectfully with others. In addition, college athletics programs impose limits on how many years a student-athlete can compete that do not exist in adult sporting competitions, where athletes can compete as long as their performances are viable or, in the case of most amateur sports, as long as they wish to. Intercollegiate athletics provides a unique opportunity to provide participation opportunities for all students regardless of race, religion, sexual orientation or gender expression.

As a core value, the NCAA believes in and is committed to diversity, inclusion and gender equity among its student-athletes, coaches and administrators. The NCAA seeks to establish and maintain an inclusive culture that fosters equitable participation for student-athletes and career opportunities for coaches and administrators from diverse backgrounds. Diversity and inclusion improve the learning environment for all student-athletes and enhance excellence within the Association.

The NCAA Office of Inclusion provides or enables programming and education, which sustains foundations of a diverse and inclusive culture across dimensions of diversity including, but not limited to age, race, sex, class, national origin, creed, educational background, disability, gender expression, geographical location,
income, marital status, parental status, sexual orientation and work experiences. In keeping with those values of inclusion, the NCAA encourages thoughtful development of policies and practices that provide fair participation opportunities for all student-athletes, including transgender individuals.

**Should the Participation of Transgender Student-Athletes Raise Concerns About Competitive Equity?**

Concern about creating an “unfair competitive advantage” on sex-separated teams is one of the most often cited reasons for resistance to the participation of transgender student-athletes. This concern is cited most often in discussions about transgender women competing on a women’s team. Some advocates for gender equality in college sports are concerned that allowing transgender women—that is, male-to-female transgender athletes who were born male, but who identify as female—to compete on women’s teams will take away opportunities for women, or that transgender women will have a competitive advantage over other women competitors.

These concerns are based on three assumptions: one, that transgender women are not “real” women and therefore not deserving of an equal competitive opportunity; two, that being born with a male body automatically gives a transgender woman an unfair advantage when competing against non-transgender women; and three, that men might be tempted to pretend to be transgender in order to compete in competition with women.

These assumptions are not well founded. First, the decision to transition from one gender to the other—to align one’s external gender presentation with one’s internal sense of gender identity—is a deeply significant and difficult choice that is made only after careful consideration and for the most compelling of reasons. Gender identity is a core aspect of a person’s identity, and it is just as deep seated, authentic, and real for a transgender person as for others. Male-to-female transgender women fully identify and live their lives as women, and female-to-male transgender men fully identify and live their lives as men.

Second, some people fear that transgender women will have an unfair advantage over non-transgender women. It is important to place that fear in context.

Transgender girls who medically transition at an early age do not go through a male puberty, and therefore their participation in athletics as girls does not raise the same equity concerns that arise when transgender women transition after puberty.

Transgender women display a great deal of physical variation, just as there is a great deal of natural variation in physical size and ability among non-transgender women and men. Many people may have a stereotype that all transgender women are unusually tall and have large bones and muscles. But that is not true. A male-to-female transgender woman may be small and slight, even if she is not on hormone blockers or taking estrogen. It is important not to overgeneralize. The assumption that all male-bodied people are taller, stronger, and more highly skilled in a sport than all female-bodied people is not accurate.4

**DR. NICK GORTON**

*American Board of Emergency Medicine, Medical Legal Consultant, Trans Health Care*

“Transgender student-athletes fall within the spectrum of physical traits found in athletes of their transitioned gender, allowing them to compete fairly and equitably.”
It is also important to know that any strength and endurance advantages a transgender woman arguably may have as a result of her prior testosterone levels dissipate after about one year of estrogen or testosterone-suppression therapy. According to medical experts on this issue, the assumption that a transgender woman competing on a women’s team would have a competitive advantage outside the range of performance and competitive advantage or disadvantage that already exists among female athletes is not supported by evidence.

Finally, fears that men will pretend to be female to compete on a women’s team are unwarranted given that in the entire 40 year history of “sex verification” procedures in international sport competitions, no instances of such “fraud” have been revealed. Instead, rather than identifying men who are trying to fraudulently compete as women, “sex verification” tests have been misused to humiliate and unfairly exclude women with intersex conditions. The apparent failure of such tests to serve their stated purpose of deterring fraud—and the terrible damage they have caused to individual women athletes—should be taken into account when developing policies for the inclusion of transgender athletes.

Educators in collegiate athletics programs must develop thoughtful and informed practices that provide opportunities for all students, including transgender students, to participate in sports. These practices must be based on sound medical science, which shows that male-to-female transgender athletes do not have any automatic advantage over other women. These practices must also be based on the educational values of sport and the reasons why sport is included as a vital component of the educational environment: promoting the physical and psychological well-being of all students, and teaching students the values of equal opportunity, participation, inclusion, teamwork, discipline, and respect for diversity.

**What Are the Benefits of Adopting Inclusive Practices Regarding Transgender Student-Athletes?**

All stakeholders in NCAA athletics programs will benefit from adopting fair and inclusive practices enabling transgender student-athletes to participate on school sports teams. School-based sports, even at the most competitive levels, remain an integral part of the process of education and development of young people, especially emerging leaders in our society. Adopting fair and inclusive participation practices will allow school and athletics leaders to fulfill their commitment to create an environment in which all students can thrive, develop their full potential, and learn how to interact with persons from diverse groups.

**JILL PILGRIM**

*Precise Advisory Group, Principal Counsel*  
*Former General Counsel & Drug Testing Program Administrator*  
*Ladies Professional Golf Association*

“Colleges need to adopt transgender student-athlete accommodation policies to remedy the silent suffering of young people who have the right to participate and enjoy the same activities that all other students have access to, without being discriminated against.”
Many schools and athletics departments identify diversity as a strength and have included sexual orientation and gender identity/expression in their non-discrimination policies. Athletics departments and personnel are responsible for creating and maintaining an inclusive and non-discriminatory climate in the areas they oversee. Adopting inclusive participation practices provides school athletics administrators with a concrete opportunity to fulfill that mandate and demonstrate their commitment to fair play and inclusion.

Moreover, when all participants in athletics are committed to fair play, inclusion, and respect, student-athletes are free to focus on performing their best in athletic competition and in the classroom. This climate promotes the well-being and achievement potential of all student-athletes. Every student-athlete and coach will benefit from meeting the challenge of overcoming fear and prejudice about social groups of which they are not members. This respect for difference will be invaluable to all student-athletes as they graduate and enter an increasingly diverse workforce in which knowing how to work effectively across differences is a professional and personal asset.

The benefits of school sports participation include many positive effects on physical, social, and emotional well-being. All students, including those who are transgender, deserve access to these benefits. When athletics departments adopt inclusive policies, they are living up to the educational values of equality that join them with the broad institutional and societal ideal of inclusion and respect for differences.
PART TWO

Recommendations for Including Transgender Student-Athletes

This section of the resource includes:

- Guiding Principles
- Recommended Policy for College Athletics
- Additional Guidelines for Transgender Student-Athlete Inclusion

Guiding Principles

Policies governing the participation of transgender student-athletes should be informed by the following principles, and be included in the institution’s transgender student-athlete policy statement:

1. Participation in intercollegiate athletics is a valuable part of the education experience for all students.
2. Transgender student-athletes should have equal opportunity to participate in sports.
3. The integrity of women’s sports should be preserved.
4. Policies governing sports should be based on sound medical knowledge and scientific validity.
5. Policies governing sports should be objective, workable, and practicable; they should also be written, available and equitably enforced.
6. Policies governing the participation of transgender students in sports should be fair in light of the tremendous variation among individuals in strength, size, musculature, and ability.
7. The legitimate privacy interests of all student-athletes should be protected.
8. The medical privacy of transgender students should be preserved.
9. Athletics administrators, staff, parents of athletes, and student-athletes should have access to sound and effective educational resources and training related to the participation of transgender and gender-variant students in athletics.
10. Policies governing the participation of transgender students in athletics should comply with state and federal laws protecting students from discrimination based on sex, disability, and gender identity and expression.

Policy Recommendations for Collegiate Athletics

Policy development governing the inclusion of transgender student-athletes is an emerging endeavor. As new research on the participation of transgender athletes and the physiological effects of gender transition on athletic performance becomes available, policies may need to be re-evaluated to ensure that they reflect the most current research-based information.
I was 18 when I started to figure out I was transgender, but the thought of telling anyone was absolutely frightening. I didn’t have the support system I needed and I didn’t know how it would impact my track and field career.

I started researching rules and regulations for transgender athletes, and while I was able to find a policy from the International Olympic Committee, I couldn’t find anything that would apply to me at the collegiate level. I later found out it was because they didn’t have any policies.

I also tried to find information about transgender athletes, which, at the time, was like trying to find a needle in a haystack. I became very fearful that you couldn’t be transgender and a champion collegiate athlete at the same time. This fear, the lack of policies and information about successful transgender athletes, and the fact that I was the track team’s biggest scorer and a national contender each year, caused me to hold off on coming out as transgender for almost three years. I was so afraid of losing everything I had worked so hard to accomplish in track and field and that I would no longer be able to compete in something that defined me as much as being transgender does.

But by the end of my junior year I couldn’t hide who I was anymore. I felt I had no choice but to face the consequences head on and come out as FTM. I was afraid if I didn’t, I wouldn’t make it through my senior year. I started by coming out to a professor/mentor. This wasn’t too hard, but I knew that I had to come out to the athletic director, and that getting his/her support was imperative in order for my “transition” of names and pronouns to work and my continued participation on the women’s track and field team to go smoothly.

At the time, my track team had a new head coach, and I was really nervous about how she was going to respond. But after having a long talk with her it was clear that she understood and that she was there to help. Together, we were able to think through how my coming out might affect the team, and come up with the best plan for telling my teammates. When I came out to the team, I wasn’t met with the fear and hate that I was expecting. In fact, it was the complete opposite. My team was awesome. The only thing that was said was, “Please forgive us if we slip on the pronouns while we adjust.” And, to tell the truth, I don’t think I ever once heard them slip up on pronouns.

Everyone’s biggest concern was how my transition was going to be received outside of Bates, as, at that time, the NCAA didn’t have any rules or guidelines about transgender athletes. Since I was already a national champion in the Women’s Hammer Throw, as well as holding the DIII national record as an 11-time all-American, we knew my coming out was very much going to be a public event. Unfortunately, things went less smoothly off-campus than on. I was extremely lucky though to have the support of my teammates and my coach, who helped me succeed despite all of the outside stresses I experienced as an FTM competing at the national level on a women’s team. My teammates were the first to defend me when people were being hateful, when the media was stalking me or when I was repetitively accused of cheating despite all of my clean drug (testosterone) tests. I had chosen to forego any medical transitioning to remain on my women’s team. My team was also there to share in the positive things that happened as a result of my coming out.
**NCAA Bylaws related to hormonal treatment and mixed teams.**

Two areas of NCAA regulations can be impacted by transgender student-athlete participation: use of banned substances and mixed team status.

A mixed team is a varsity intercollegiate sports team on which at least one individual of each gender competes. *(Revised: 5/8/06)*. NCAA Bylaw 18.02.2 for purposes of meeting the required minimums set forth in Bylaws 18.2.3 and 18.2.4, a mixed team shall be counted as one team. A mixed team shall count toward the minimum sponsorship percentage for men’s championships.

- NCAA rules state that a male participating in competition on a female team makes the team a “mixed team.” The mixed team can be used for sports sponsorship numbers (provided other conditions, such as being an acceptable NCAA sport, outlined in Bylaw 20.9 (Division I), 20.10 (Division II) and 20.11 (Division III) are met) and counts toward the mixed/men’s team minimums within the membership sports-sponsorship requirements. Such a team is ineligible for a women’s NCAA championship but is eligible for a men’s NCAA championship.

- A female on a men’s team does not impact sports sponsorship in the application of the rule—the team still counts toward the mixed/men’s numbers. Such a team is eligible for a men’s NCAA championship.

- Once a team is classified as a mixed team, it retains that status through the remainder of the academic year without exception.

NCAA Bylaw 31.2.3 identifies testosterone as a banned substance, and provides for a medical exception review for demonstrated need for use of a banned medication. It is the responsibility of the NCAA institution to submit the request for a medical exception (see [www.ncaa.org/drugtesting](http://www.ncaa.org/drugtesting)) for testosterone treatment prior to the student-athlete competing while undergoing treatment. In the case of testosterone suppression, the institution must submit written documentation to the NCAA of the year of treatment and ongoing monitoring of testosterone suppression.
NCAA Policy on Transgender Student-Athlete Participation

The following policies clarify participation of transgender student-athletes undergoing hormonal treatment for gender transition:

1. A trans male (FTM) student-athlete who has received a medical exception for treatment with testosterone for diagnosed Gender Identity Disorder or gender dysphoria and/or Transsexualism, for purposes of NCAA competition may compete on a men’s team, but is no longer eligible to compete on a women’s team without changing that team status to a mixed team.

2. A trans female (MTF) student-athlete being treated with testosterone suppression medication for Gender Identity Disorder or gender dysphoria and/or Transsexualism, for the purposes of NCAA competition may continue to compete on a men’s team but may not compete on a women’s team without changing it to a mixed team status until completing one calendar year of testosterone suppression treatment.8

Any transgender student-athlete who is not taking hormone treatment related to gender transition may participate in sex-separated sports activities in accordance with his or her assigned birth gender.

- A trans male (FTM) student-athlete who is not taking testosterone related to gender transition may participate on a men’s or women’s team.

- A trans female (MTF) transgender student-athlete who is not taking hormone treatments related to gender transition may not compete on a women’s team.

ERIC VILAIN
M.D., Ph.D., Professor, Director of the Center for Gender-Based Biology and Chief Medical Genetics Department of Pediatrics, UCLA

“Research suggests that androgen deprivation and cross sex hormone treatment in male-to-female transsexuals reduces muscle mass; accordingly, one year of hormone therapy is an appropriate transitional time before a male-to-female student-athlete competes on a women’s team.”
Additional considerations

The student’s responsibilities

1. In order to avoid challenges to a transgender student’s participation during a sport season, a student-athlete who has completed, plans to initiate, or is in the process of taking hormones as part of a gender transition should submit the request to participate on a sports team in writing to the director of athletics upon matriculation or when the decision to undergo hormonal treatment is made.

2. The request should include a letter from the student’s physician documenting the student-athlete’s intention to transition or the student’s transition status if the process has already been initiated. This letter should identify the prescribed hormonal treatment for the student’s gender transition and documentation of the student’s testosterone levels, if relevant.

The school’s responsibilities

1. The director of athletics should meet with the student to review eligibility requirements and procedure for approval of transgender participation.

2. If hormone treatment is involved in the student-athlete’s transition, the director of athletics should notify the NCAA of the student’s request to participate with a medical exception request.

3. To assist in educating and in development of institutional policy and practice, a Transgender Participation Committee should be established. Members of the committee should represent a cross section of the institutional staff with student well-being interests, and include representation from the following departments: office of general counsel, health and counseling, faculty/academic affairs, and athletics.

4. All discussions among involved parties and required written supporting documentation should be kept confidential, unless the student-athlete makes a specific request otherwise. All information about an individual student’s transgender identity and medical information, including physician’s information provided pursuant to this policy, shall be maintained confidentially.
Part Three describes best practices — the actions that coaches, administrators and student-athletes can take to assure the inclusion of transgender student-athletes. Although these practices specifically address transgender student-athletes, they can be used to address discrimination based on other factors as well, such as race, religion, class, and sexual orientation.

The first part of this section describes general best practices for everyone. The next sections identify best practices recommended specifically to athletics administrators, coaches, student-athletes, and athletics staff who interact with the media.

**Overall Best Practices**

1. **Provide Equal Opportunity** — Colleges and universities often have legal obligations to provide equal opportunity to student-athletes and to personnel, including coaches. All those involved in athletics should be aware of these obligations, and treat them as core values, guiding policies and practices. Transgender discrimination may be a part of a systemic problem where the broader environment is unfriendly or discriminatory toward lesbian, gay, bisexual, and transgender people. This can negatively affect all men and women who participate in athletic competition. If discrimination is accepted as part of the common practices of an athletics department, this will undermine the core principle of equal opportunity.

2. **Value Diversity** — In creating guidelines or best practices for including transgender student-athletes, it is important to place this conversation in the context of the athletics department’s broad commitments to safety, fairness, and respect for all participants. It helps when athletics department leadership, including coaches, value all aspects of diversity. Collegiate athletics provides an opportunity for students to compete with and against others who come from different races, cultures, religions, sexual
orientations, gender identities and expressions, and social classes, but all of whom share the common
goal of achieving athletic excellence. Valuing this common ground enhances the social and competitive
eexperience for all. Athletics administrators should make their commitment to valuing diversity explicit in media interviews and other public speaking opportunities as well as in meetings with athletics department staff. That diversity-valuing approach then shapes and informs activities throughout the athletics department and is conveyed to coaches and student-athletes. Everyone should also understand how these core values are important to team success and to individual team member development. Teams that value each member’s contribution to the unit, while respecting individual differences, provide a foundation for the whole team and each member of the team to focus on achieving their athletic and academic goals.

3. **Establish policy** — When diversity values are explicit, athletics departments, institutions, state, and national governing organizations are in a position to develop specific policy statements that reflect a commitment to these values. These policy statements, if followed, protect schools, administrators, student-athletes, and coaches from litigation and other negative consequences. Coaches should know that they may have a transgender student-athlete on their teams and should be equipped to make that experience a positive one for the athlete and teammates. Parents should communicate the importance of these values in meetings with prospective coaches and athletics administrators. Student-athletes can discuss these values with new team members and in public speaking opportunities.

**Laurie Priest**  
*Chair of Physical Education and Director of Athletics, Mt. Holyoke College*

“It is imperative that administrators and coaches provide a safe and inclusive environment so that all student-athletes can participate and achieve success. Being aware of appropriate laws can help us to develop policies and implement practices to assure that all of our students are treated with respect.”

**Best Practices for Athletics Administrators**

Best practices for athletics administrators focus on policy development, discrimination prevention, education, enforcement procedures, and consequences. These best practices will be helpful to a wide range of athletics administrators in organizations including colleges and universities, collegiate sport-governing organizations, coaches associations, and athletics conferences.

1. If the school does not have an inclusive non-discrimination and harassment policy, work with other school administrators to adopt a policy that includes gender identity and expression.
2. Respect the right to privacy of all student-athletes with respect to personal information (including whether a student is transgender) when discussing gender identity and expression and understand that all medical information must be kept confidential in accordance with applicable state, local, and federal privacy laws.
3. Become knowledgeable about collegiate non-discrimination and harassment policies that include gender identity and expression.
4. Include gender identity and expression in departmental non-discrimination statements on all official department documents and web sites.
5. Become aware of state and federal non-discrimination laws that prohibit discrimination based on gender identity and expression (see Part 4 Appendix C for a list of relevant federal and state laws).
6. Adopt an effective and fair athletics departmental policy addressing the participation of transgender
student-athletes that is consistent with school policy and state or federal non-discrimination laws.

7. Educate all members of the athletics department community (including staff, student-athletes, and parents) about departmental and school policy regarding the participation of transgender student-athletes in athletics.

8. Educate yourself about transgender identity, preferred terminology, and current scientific perspectives on the participation of transgender student-athletes on men’s and women’s sports teams.

9. Work with athletics conferences of which your school is a member to adopt fair and effective policies governing the participation of transgender student-athletes.

10. Recommend that your athletics conference sponsor educational programs for coaches and student-athletes on the inclusion of transgender student-athletes, preferred terminology, and understanding transgender identity.

11. Recommend that professional associations for athletics administrators sponsor educational programs on the inclusion of transgender student-athletes, preferred terminology, understanding transgender identity, and adopting fair and effective policies.

12. Educate all members of the sports information department about transgender identity, preferred terminology, department policies governing the participation of transgender student-athletes, and confidentiality requirements when discussing transgender student-athlete participation with the media.

Best Practices for Coaches

Best practices for coaches focus on acquiring knowledge about transgender student-athletes, understanding legal and ethical obligations, maintaining professional conduct, and ensuring that those with whom coaches work are also educated and aware of these issues.

1. Become knowledgeable about school non-discrimination and harassment policies that include gender identity and expression.

2. Become knowledgeable about departmental and school policy regarding the participation of transgender student-athletes in athletics.

3. If your department does not have a policy addressing the participation of transgender student-athletes, ask your athletic director to adopt one.

4. Educate student-athletes on your team about transgender identity, preferred terminology, and departmental/school policies regarding the participation of transgender student-athletes on sports teams.

5. Be prepared to talk with parents of student-athletes about transgender student-athletes’ participation on school teams.

6. Use respectful and preferred language and terminology when discussing transgender student-athlete participation or interacting with a transgender student-athlete.

7. Anticipate and address transgender student-athlete access issues proactively and in accordance with departmental policy regarding locker room use, toilet and shower availability, hotel room assignment, uniforms and dress codes.

8. Recommend that coaches associations to which you belong adopt fair and effective policy statements addressing the participation of transgender student-athletes.

9. Recommend that coaches associations to which you belong sponsor educational programs addressing the participation of transgender student-athletes.

10. If you are aware of discriminatory or harassing behavior from opposing teams or spectators based on the perceived or actual gender identity or expression of a student-athlete, talk to the opposing coach and ask your director of athletics to talk with the opposing school’s athletic director.

11. Respect the right to privacy of all student-athletes with respect to personal information (including whether a student is transgender) when discussing gender identity and expression and understand that all medical information must be kept confidential in accordance with applicable state, local, and federal privacy laws.
JENNIFFER ‘JAY’ HARTSHORN  
Track and Field Coach, Bates College

“I think it’s important for us to be aware there are transgender student-athletes who want to compete, and with a little preparation, including transgender athletes isn’t a big deal.”

Best Practices for Student-Athletes

Best practices for student-athletes who have transgender teammates focus on respectful behavior, safety, and valuing diversity.

1. Use respectful and preferred language and terminology when discussing transgender student-athlete participation or interacting with a transgender teammate.
2. Become familiar with departmental and school policy governing the participation of transgender student-athletes in athletics.
3. Learn about school non-discrimination and harassment policies that include gender identity and expression.
4. Encourage other student-athletes to use respectful language when discussing transgender issues in sports or interacting with a transgender student-athlete.
5. Respect the right to privacy of all student-athletes with respect to personal information (including whether a student is transgender) when discussing gender identity and expression.
6. Ask your coach and director of athletics for team and departmental educational training concerning transgender student-athlete participation.
7. If taunting or harassment from spectators or opponents occurs during competition, take the approach that these actions are never acceptable for any reason including taunting or harassment based on gender identity or expression. Make your coaches aware of discriminatory or harassing behavior and ask them to arrange a meeting with the opposing school’s director of athletics to address this behavior.
8. Ask your student-athlete advisory committee to plan an activity that focuses on the participation of transgender athletes in sports and frame the issue as one of equal opportunity in sports and fair treatment for all.
KYE ALLUMS, 2008-11, CLASS OF 2012
Women’s NCAA Division I Basketball Student-Athlete
George Washington University

Coming to the realization that I am a transgender man has been an incredible and mind-blowing experience. I had to overcome a lot of mental blocks to get there, but when I got to college and had my first taste of independence, I was finally able to come to terms with how I truly felt and what I needed.

Growing up, I felt that I had to hide a part of my self from my family because of my mother’s strong beliefs against homosexuality. That was really stressful for me. After I graduated from high school, I moved away from my family. That gave me the space to figure out who I am, which turned out to be the best thing that ever happened to me.

When I first had the feeling of being uncomfortable when someone would call me a “lady,” I did some research to try to figure out what that feeling could possibly mean. The first thing that I came across was the term “transsexual,” which is when a person’s sex doesn’t match their gender identity and they have taken the steps possible, like surgery and hormones, so that their sex and gender will match. I read about many different terms and definitions and the one that I could relate to the most was “transgender,” which just means that your gender and your body don’t match.

After I had a word to describe what I was feeling, I started getting extremely distressed when other people would refer to me as “she,” or hearing people refer to me and a group of women as “ladies,” or seeing the label “women’s” outside my locker room. The feeling of having someone call you something that you know you are not is the most frustrating, uncomfortable feeling ever. During my first and second year of college, I kept hearing those terms applied to me and feeling worse and worse about it. A pain built up in my stomach and chest as if there were a ton of bricks weighing on me and my emotions. I felt trapped and miserable—I learned that the medical term is “dysphoric”—because I could not escape the way people saw me, because the body that I was born in did not match my gender.

Even though I was feeling so bad, it was very hard for me to build up enough courage to say anything, because I was afraid that other people wouldn’t accept me. After freshmen year I told my closest teammates that I identify as a guy. At first they laughed and thought it was a joke, and I couldn’t bring myself to correct them. But over time, it got to the point where it was unbearable to keep living like this. For a while I felt like I had to choose between playing basketball or quitting to transition into the person I want to become. But I didn’t want to walk out on playing a game that I love, and that has afforded me a full scholarship to pay for my education. So I finally began correcting my friends and teammates every time they would refer to me as “she” or “her.”

When my friends and close teammates saw the pain and sadness it caused me when people referred to me using female pronouns, they began to use male pronouns and to correct others for me. Their respect for what I wanted to be called meant the world to me and still does. Without their support I would not be playing basketball right now.

My teammates’ support made a huge difference, but of course they could not be with me all the time to correct everyone. I didn’t feel comfortable correcting people on my own all the time, because I would have to explain the entire story of why I wanted to be called a guy. I felt depressed by the constant reminders that I was “Ms. Allums” every time I had to show my identification: at the doctor’s office, the gym, the bank, restaurants, stores, and pretty much anywhere I went.

So I decided to take the steps needed to get my name changed so I could have some kind of tangible proof that I was becoming the man I knew I was. That process took four months, and it was very difficult and time-consuming, but the day it was done I was the happiest guy alive.

The happiness wore off the next day, though, when I heard my coaches still using female pronouns. I knew then that it wasn’t enough to only tell my closest friends—I had to tell everyone that I talked to on a daily basis. Once I made the difficult decision to tell my coaches, the rest of my teammates, and my family, I received nothing but support from them, which has been irreplaceable. With the love and respect of the people around me, I no longer feel like I have to choose between being true to myself and staying in school playing the sport I love.
**Best Practices for Athletics Staff Interacting With Media About Transgender Student-Athlete Issues**

Best practices for interacting with the media focus on the importance of understanding basic information about transgender identity, preferred terminology, and respecting confidentiality of student-athletes.

1. The school or athletics department should provide training to all athletics staff who may interact with the media.
2. Respect the confidentiality of all student-athletes when discussing transgender issues with the media and understand that all medical information must be kept confidential in accordance with applicable state, local, and federal privacy laws.
3. Use appropriate language in media interviews or presentations and insist that this terminology be used in media reports on transgender issues in athletics.
4. Focus on the importance of providing equal opportunities for all students to participate in athletics.
5. Describe how departmental policies provide equal opportunities for all students to participate in athletics.

**Additional Guidelines for Transgender Student-Athlete Inclusion**

The following additional guidelines will assist colleges, athletics departments, coaches, teams, and student-athletes in creating an environment in which all student-athletes are safe and fairly treated.

**Facilities Access**

1. Changing Areas, Toilets, Showers — Transgender student-athletes should be able to use the locker room, shower, and toilet facilities in accordance with the student’s gender identity. Every locker room should have some private, enclosed changing areas, showers, and toilets for use by any athlete who desires them. When requested by a transgender student-athlete, schools should provide private, separate changing, showering, and toilet facilities for the student’s use, but transgender students should not be required to use separate facilities.

2. Competition at Another School — If a transgender student-athlete requires a particular accommodation to ensure access to appropriate changing, showering, or bathroom facilities, school leaders, athletic directors, and coaches, in consultation with the transgender student-athlete, should notify their counterparts at other schools prior to competitions to ensure that the student has access to facilities that are comfortable and safe. This notification should maintain the student’s confidentiality. Under no circumstances should a student-athlete’s identity as a transgender person be disclosed without the student’s express permission.

3. Hotel Rooms — Transgender student-athletes generally should be assigned to share hotel rooms based on their gender identity, with a recognition that any student who needs extra privacy should be accommodated whenever possible.

**Language**

1. Preferred Names — In all cases, teammates, coaches and all others in the school should refer to transgender student-athletes by a student’s preferred name.

2. Pronouns — Similarly, in all cases, pronoun references to transgender student-athletes should reflect the student’s gender and pronoun preferences.

**Dress Codes and Team Uniforms**

1. Dress Codes — Transgender student-athletes should be permitted to dress consistently with their gender identities. That is, a female-to-male transgender athlete should be permitted to dress as a male. A male-to-female should be permitted to dress as a female.

   For reasons unrelated to trans-inclusion, schools should evaluate the necessity of gendered dress codes.
and recognize that they tend to marginalize a range of students who may not feel comfortable with them. Dress codes for athletic teams when traveling or during a game day at school should be gender-neutral. Instead of requiring a girls’ or women’s team to wear dresses or skirts, for example, ask that team members wear dresses or slacks that are clean, neat, well cared for and appropriately “dressy” for representing their school and team.

2. Uniforms — All team members should have access to uniforms that are appropriate for their sport and that they feel comfortable wearing. No student should be required to wear a gendered uniform that conflicts with the student’s gender identity.

Education

1. Institutions — All members of the university community should receive information and education about transgender identities, institutional and conference non-discrimination policies, the use of preferred names and pronouns, and expectations for creating a respectful team and school climate for all students, including transgender and gender-variant students.

2. Athletics Conference Personnel — Athletics conference leaders should be educated about the need for policies governing the participation of transgender student-athletes, develop such policies, and ensure that all schools in the conference understand and adopt the policies.

3. Opposing Teams/Universities — Without violating a transgender student’s confidentiality or privacy, school leaders, athletic directors, and coaches should communicate with their counterparts at other schools prior to competitions in which a transgender athlete is participating about expectations for treatment of transgender student-athletes on and off the field. This does not require “outing” or otherwise identifying a particular student-athlete as transgender, but rather establishing general expectations for the treatment of all student-athletes, including those who may be transgender.

Media

1. Training — All school or athletics representatives (conference leaders, sports information departments and personnel, school leaders, athletics administrators, team members, and coaches) who are authorized to speak with the media should receive information about appropriate terminology, use of names and pronouns, and school and athletics conference policies regarding the participation of transgender student-athletes on school sports teams.

2. Confidentiality — Protecting the privacy of transgender student-athletes must be a top priority for all athletics department and affiliated school personnel, particularly when in the presence of the media. All medical information shall be kept confidential in accordance with applicable state, local, and federal privacy laws.

Enforcement and non-Retaliation

1. Enforcement — Any member of an athletics department who has been found to have violated this policy by threatening to withhold athletic opportunity or harassing any student on the basis of their gender identity or expression, or by breaching medical confidentiality, will be subject to disciplinary action, up to and including discharge or expulsion from the school. The athletics department should take appropriate remedial action to correct the situation. Any member of the athletics department who becomes aware of conduct that violates this policy should report the conduct to the appropriate official such as the director of athletics.

2. Retaliation — Retaliation is specifically forbidden against anyone who complains about discrimination based on gender identity or expression, even if the person was in error. Athletics departments should take steps to prevent any retaliation against any person who makes such a complaint.
Definitions and Terminology: A Word About Words

Language has immense power to shape our perceptions of other people. Using accurate language can help to overcome many of the misperceptions associated with gender and transgender people. Although the vocabulary related to transgender people continues to evolve, here are some working definitions and examples of frequently used (and misused) terms.

**Biological/Anatomical Sex** — The physical characteristics typically used to assign a person’s gender at birth, such as chromosomes, hormones, internal and external genitalia and reproductive organs. Given the potential variation in all of these, biological sex must be seen as a spectrum or range of possibilities rather than a binary set of two options.

**Gender** — The complex relationship between physical traits and one’s internal sense of self as male, female, both or neither as well as one’s outward presentations and behaviors related to that perception. Biological sex and gender are different; gender is not inherently connected to one’s physical anatomy.

**Gender Identity** — One’s inner concept of self as male or female or both or neither. One’s gender identity can be the same or different than the gender assigned at birth. Most people become conscious of their gender identity between the ages 18 months and 3 years. Most people have a gender identity that matches their assigned gender at birth. For some, however, their gender identity is different from their assigned gender. Some of these individuals choose to live socially as the other gender and may also hormonally and/or surgically change their bodies to more fully express their gender identity. All people have gender identity, not just transgender people.

**Gender Expression** — Refers to the ways in which people externally communicate their gender identity to others through behavior, clothing, haircut, voice, and other forms of presentation. Gender expression also works the other way as people assign gender to others based on their appearance, mannerisms, and other gendered characteristics. Many transgender people seek to make their external appearance—their gender expression—congruent with their internal gender identity through clothing, pronouns, names, and, in some cases, hormones and surgical procedures. All people have gender expression, not just transgender people.

**Transgender** — Sometimes used as an ‘umbrella term’ to describe anyone whose identity or behavior falls outside of stereotypical gender norms. More narrowly defined, it refers to an individual whose gender identity does not match their assigned birth gender. Being transgender does not imply any specific sexual orientation (attraction to people of a specific gender.) Therefore, transgender people may additionally identify as straight, gay, lesbian, or bisexual.

**Sexual Orientation** — Term that refers to being romantically or sexually attracted to people of a specific gender. Our sexual orientation and our gender identity are separate, distinct parts of our overall identity. Although a child may not yet be aware of their sexual orientation, they usually have a strong sense of their gender identity.

**Genderqueer** — This term represents a blurring of the lines around gender identity and sexual orientation. Genderqueer individuals typically reject notions of static categories of gender and embrace a fluidity of gender identity and sexual orientation. This term is typically assigned an adult identifier and not used in reference to preadolescent children.

**Gender Nonconforming/Gender Variant** — Refers to individuals whose behaviors and/or interests fall outside what is considered typical for their assigned gender at birth. Someone who identifies as “gender nonconforming” is not necessarily transgender. To the contrary, many people who are not transgender do not conform to gender stereotypes in their appearance, clothing, physical characteristics, interests, or activities.

**Gender Fluidity** — Gender fluidity conveys a wider, more flexible range of gender expression, with interests and behaviors that may even change from day to day. Gender fluid individuals do not feel confined by restrictive boundaries of stereotypical expectations of girls or boys.
Intersex — An estimated one in 2,000 babies is born with an “intersex” condition or Disorders of Sex Development (DSD). People with intersex conditions (DSD) are born with physically mixed or atypical bodies with respect to sexual characteristics, i.e. chromosomes, internal reproductive organs, and genitalia. These characteristics may not be visible and individuals may not be aware of the condition. Having an intersex condition does not necessarily affect a person’s gender identity.

FTM (Female-to-Male)/Affirmed male/transboy — A child or adult who was assigned to the female gender at birth but has a male gender identity.

MTF (Male-to-Female)/Affirmed female/transgirl — A child or adult who was assigned to the male gender at birth but has a female gender identity.

Transition — The process by which a transgender individual lives consistently with his or her gender identity, and which may (but does not necessarily) include changing the person’s body through hormones and/or surgical procedures. Transition can occur in three ways: social transition through changes in clothing, hairstyle, name and/or pronouns; hormonal transition through the use of medicines such as hormone “blockers” or cross hormones to promote gender-based body changes; and/or surgical transition in which an individual’s body is modified through the addition or removal of gender-related physical traits. Based on current medical knowledge and practice, genital reconstructive surgery is not required in order to transition. Most transgender people in the United States do not have genital reconstructive surgery.

Transsexual — An individual whose gender identity does not match the person’s sex at birth. This individual usually desires to physically alter their bodies surgically and/or hormonally. This physical transition is a complicated, multi-step process that may take years and may include, but is not limited to, cross-gender hormone therapy and a variety of surgical procedures. The precise treatments required vary from person to person.

Transphobia — Fear or hatred of transgender people. Transphobia is manifested in a number of ways, including violence, harassment, and discrimination.

Organizations/Websites

**American Bar Association (ABA)** — The ABA opposes discrimination against those who are transgender or gender non-conforming. In 2006, the ABA House of Delegates adopted a recommendation that all federal, state, local and territorial governments enact legislation prohibiting discrimination on the basis of actual or perceived gender identity or expression, in employment, housing and public accommodations. For more information visit www.abanet.org/leadership/2006/annual/dailyjournal/hundredtwentytwob.doc.

**Advocates for Informed Choice** — Legal advocacy organization dedicated to promoting the civil rights of children with intersex conditions or disorders of sex development. www.aiclegal.org

**American Civil Liberties Union (ACLU)** — The ACLU Lesbian, Gay, Bisexual, Transgender Project fights discrimination and moves public opinion through the courts, legislatures and public education across five issue areas: Relationships, Youth & Schools, Parenting, Gender Identity and Expression and Discrimination in Employment, Housing and other areas. www.aclu.org/lgbt-rights
American Medical Association (AMA) — The AMA is a medical professional association whose mission is to promote the art and science of medicine and the betterment of public health. The AMA has adopted a number of policies supporting the right of transgender and gender-non-conforming persons to be free from discrimination on the basis of their gender identity or expression. www.ama-assn.org

American Psychological Association (APA) — In 2008, the APA Council of Representatives adopted a policy statement supporting “the passage of laws and policies protecting the rights, legal benefits, and privileges of people of all gender identities and expressions;” and as well as supporting “efforts to provide safe and secure educational environments, at all levels of education.” www.apa.org/about/governance/council/policy/transgender.aspx

Gay and Lesbian Advocates and Defenders Transgender Rights Project — Through the Transgender Rights Project (TRP), Gay and Lesbian Advocates and Defenders puts litigation, legislative, and educational assets to work in a focused way to establish clear legal protections for the transgender community. www.glad.org

Gay, Lesbian and Straight Education Network — The Gay, Lesbian and Straight Education Network strives to assure that each member of every school community is valued and respected regardless of sexual orientation or gender identity/expression. www.glsen.org

Gender Spectrum — Gender Spectrum provides education, training and support to help create a gender sensitive and inclusive environment for all children and teens. www.genderspectrum.org

It Takes A Team! Education Campaign for LGBT Issues in Sport — A Women’s Sports Foundation initiative, It Takes A Team! Education Campaign for Lesbian, Gay, Bisexual, and Transgender Issues in Sport is an education project focused on eliminating homophobia as a barrier to all women and men participating in sport. www.ittakesateam.org

Lambda Legal — Lambda Legal is a national organization committed to achieving full recognition of the civil rights of lesbians, gay men, bisexuals, transgender people and those with HIV through impact litigation, education and public policy work. www.lambdalegal.org

National Center for Lesbian Rights — NCLR is a national legal organization committed to advancing the civil and human rights of lesbian, gay, bisexual, and transgender people and their families through litigation, public policy advocacy, and public education. www.nclrights.org

National Center for Transgender Equality — The National Center for Transgender Equality is a social justice organization dedicated to advancing the equality of transgender people through advocacy, collaboration and empowerment. www.transequality.org

NCAA Office of Inclusion — www.ncaa.org/lgbt

National Gay and Lesbian Task Force — The mission of the National Gay and Lesbian Task Force is to build the grassroots power of the LGBT community by training activists, equipping state and local organizations with the skills needed to organize broad-based campaigns to defeat anti-LGBT referenda and advance pro-LGBT legislation, and building the organizational capacity of the movement. www.thetaskforce.org

Parents and Friends of Lesbians and Gays-TNET — The purpose of this special affiliate of PFLAG is to promote the health and well-being of transgender persons, their families and friends through: support, to cope with an adverse society; education, to enlighten an ill-informed public; and advocacy, to end discrimination and to secure equal civil rights. PFLAG TNET focuses on support for transgender people and their parents,
families, and friends; education on transgender facts and issues; and advocacy for equal rights for the transgender community at local and national levels. www.pflag.org/tnet

Transgender Law Center — Transgender Law Center (TLC) connects transgender people and their families to culturally competent legal services, increases acceptance and enforcement of laws and policies that support California’s transgender communities, and works to change laws and systems that fail to incorporate the needs and experiences of transgender people. www.transgenderlawcenter.org

Transgender Law and Policy Institute — Transgender Law and Policy Institute (TLPI) is a non-profit organization dedicated to engaging in effective advocacy for transgender people in our society. The TLPI brings experts and advocates together to work on law and policy initiatives designed to advance transgender equality. www.transgenderlaw.org

World Professional Association for Transgender Health (WPATH) — WPATH is an international, interdisciplinary organization of professionals from fields of psychiatry, endocrinology, surgery, law, psychology, sociology, and counseling. WPATH publishes the internationally recognized Standards of Care for Gender Identity Disorders, an evolving consensus on best practice in the provision of medical treatments for individuals with Gender Identity Disorder. www.wpath.org

VIDEOS

Straightlaced: How Gender’s Got Us All Tied Up
Straightlaced: How Gender’s Got Us All Tied Up takes a powerful and intimate look at how popular pressures around gender and sexuality are shaping the lives of American teens. The film proudly showcases the diverse and unscripted voices of more than 50 high school students from a variety of different communities, all of whom speak with breathtaking honesty, insight, and humor about gender roles and their struggles to be who they really are. More information on the film is available at www.groundspark.org/our-films-and-campaigns/straightlaced

Transgender Student-Athlete
A 30-minute video presentation sponsored by the NCAA and conducted by Dr. Betsy Crane, Widener University, http://s3.amazonaws.com/ncaa/web_video/diversity_inclusion/transgenderSA.html. Dr. Crane presents a sex educator’s expertise on gender awareness and diversity, and provides definition to assist the viewer in understanding best practices for including transgender students in athletics participation.
PART FOUR:

APPENDIX C

Legal Status of Transgender People

Federal, state, and local laws prohibit discrimination on the basis of gender identity/expression. In addition, many K-12 and collegiate educational institutions have adopted non-discrimination policies that include gender identity/expression. Each school or school district should be knowledgeable about specific legal requirements that apply and make sure that all school athletic staff understand their responsibilities to abide by and enforce these laws.

Federal Protections

**Title IX of the Education Amendments of 1972** — The purpose of Title IX is to address sex discrimination in schools. This federal law also addresses discrimination or harassment in schools based on gender stereotypes. As described by the Department of Education’s Office for Civil Rights guidance in 2010, when gender non-conforming or transgender students are targeted on the basis of their gender expression, Title IX may provide the basis for legal recourse. Schools are responsible for developing educational programs, preventative policy and grievance procedures to address sexual harassment, bullying and assault.

**Equal Protection Clause of the Fourteenth Amendment of the United States Constitution** — The Equal Protection clause states that “no state shall … deny to any person within its jurisdiction the equal protection of the laws.” Several successful cases involving allegations of harassment and discrimination against lesbian, gay, bisexual, and transgender students and staff in public schools have been based on the Equal Protection clause.

**The Employment Non-Discrimination Act (ENDA)** — ENDA is a bill that was introduced in the 111th U.S. Congress in 2009. If passed into law, ENDA would provide basic protections against workplace discrimination on the basis of sexual orientation or gender identity. The bill is closely modeled on existing civil rights laws, including Title VII of the Civil Rights Act of 1964 and the Americans with Disabilities Act. ENDA prohibits public and private employers from using an individual’s sexual orientation or gender identity as the basis for employment decisions, such as hiring, firing, promotion or compensation. ENDA also applies to federal, state, and local government employees.

**The Matthew Shepard and James byrd, Jr. Hate Crimes Prevention Act (HCPA)** — The HCPA gives the Department of Justice (DOJ) the power to investigate and prosecute bias-motivated violence by providing the DOJ with jurisdiction over crimes of violence where a perpetrator has selected a victim because of the person’s actual or perceived race, color, religion, national origin, gender, sexual orientation, gender identity or disability. Furthermore, the HCPA requires the Federal Bureau of Investigation to track statistics on hate crimes.

State of Non-Discrimination Law

As of July 2010, 13 states and the District of Columbia have enacted non-discrimination laws prohibiting discrimination on the basis of sexual orientation and gender identity or expression: California, Colorado, Hawaii, Illinois, Iowa, Maine, Minnesota, New Jersey, New Mexico, Oregon, Rhode Island, Vermont, and Washington.

Eight additional states have enacted laws prohibiting discrimination based on sexual orientation only: Connecticut, Delaware, Maryland, Massachusetts, Nevada, New Hampshire, New York, and Wisconsin.

Additionally, courts and administrative bodies in seven states have interpreted state laws against sex discrimination to prohibit discrimination against transgender and gender nonconforming people: California, Connecticut, Florida, Massachusetts, New Jersey, New York, and Pennsylvania. Courts and administrative bodies in seven states have also held that transgender people are protected by state laws prohibiting discrimina-
tion based on disability or medical condition: Florida, Illinois, Massachusetts, New Hampshire, New Jersey, New York, and Washington.\textsuperscript{31}

**State Student Rights Laws**

In addition to these federal protections, as of July 2010, twelve states and the District of Columbia\textsuperscript{32} have enacted laws protecting students in schools from discrimination or harassment on the basis of sexual orientation or gender identity: California, Colorado, Illinois, Iowa, Maine, Maryland, Minnesota, New Jersey, North Carolina, Oregon, Vermont, and Washington.\textsuperscript{33} Four additional states offer protections on the basis of sexual orientation only: Connecticut, Massachusetts, New York, and Wisconsin.\textsuperscript{34}

**Individual School or School District Non-Discrimination Policies**

For a list of colleges and universities that have enacted non-discrimination policies that include gender identity/expression, refer to the following list created by the Transgender Law and Policy Institute: \url{www.transgenderlaw.org/college/index.htm#policies}

For a list of K-12 school districts that have enacted non-discrimination policies that include gender identity/expression, refer to the following list created by the Transgender Law and Policy Institute: \url{www.transgenderlaw.org/college/index.htm#schools}

The American Bar Association (ABA) opposes discrimination against those who are transgender or gender non-conforming. The ABA is a national organization of lawyers, law students and judges, and is the largest voluntary professional association in the world, with more than 400,000 members. The control and administration of the ABA is vested in the House of Delegates, which is the policy-making body of the Association. In 2006, the ABA House of Delegates adopted a recommendation that all federal, state, local, and territorial governments enact legislation prohibiting discrimination on the basis of actual or perceived gender identity or expression, in employment, housing, and public accommodations.\textsuperscript{35}
ACKNOWLEDGEMENTS

The NCAA resource accepted input from the report, “On the Team: Equal Opportunity for Transgender Student Athletes” published in October, 2010. In October 2009 the National Center for Lesbian Rights and It Takes A Team!, an Initiative of the Women’s Sports Foundation, co-sponsored a national think tank entitled “Equal Opportunities for Transgender Student-Athletes.” Think Tank participants included leaders from the NCAA, the National High School Federation, transgender student-athletes, and experts on transgender issues from a range of disciplines—law, medicine, advocacy, and athletics. The NCAA also would like to acknowledge and thank George Washington University and Kyle Allums for their efforts in educating and raising awareness of transgender student-athlete participation.

Participants of the 2009 Think Tank included:

Stephanie Brill  
**Founding Director**  
Gender Spectrum Education and Training  
Orinda, California

Walter Bockting, Ph.D.  
**President of WPATH**  
**Associate Professor**  
Program in Human Sexuality

4 In addition, what counts as a competitive advantage may shift dramatically depending on the sport. What is an advantage in one context may be a disadvantage in another. For example, factors such as height, weight, reaction time, and proportion of fast twitch muscle fibers all affect competitive advantage depending on the sport. A female volleyball player may be very tall, and yet few people would consider that to be an unfair competitive advantage in her sport. Similarly, a male swimmer may have a naturally high hemoglobin count enabling him to take in more oxygen, but he is not barred from swimming for that reason. NCAA Office of Inclusion
Developing Policies for Transgender Students on High School Teams

By Pat Griffin on September 08, 2015 hst

As high schools and state associations nationwide continue to provide opportunities for all young people to participate in high school athletics, the inclusion of transgender students on high school athletic teams is a key issue across the country.

Transgender students are those whose gender they were assigned at birth does not match how they identify their gender. A student might have been identified as a boy at birth, but now identifies as a girl, or vice-versa. Transgender students often report experiencing harassment and bullying from their classmates, as well as inaction from their teachers or coaches when they report being taunted or physically assaulted (GLSEN, 2011).

Currently, 13 states and the District of Columbia have enacted laws protecting students from discrimination based on their gender identity. In an effort to encourage their protection, an April 2014 letter from the Federal Office of Civil Rights clarified that discrimination against transgender students in schools is covered by Title IX and educators in schools across the United States are accountable for ensuring the safety and inclusion of transgender students in all school-sponsored activities (Department of Education, 2014).

Athletics is an integral part of the extracurricular program offered in practically every high school in the United States and schools are accountable for ensuring that all students have equal access to participation. Participation in high school sports is recognized as an important aspect of developing positive self-esteem and a connection to school and community as well as a deterrent to the use of alcohol, drugs, tobacco or other unhealthy activities. Ensuring that all students, including transgender students, have the opportunity to participate in a wide variety of school sports experiences complements the academic mission of schools.
Recent research (GLSEN, 2011) indicates that discrimination prevents many transgender students from participating in school sports fully and safely. According to this research, school officials often see transgender students’ interest in participating in sports according to their affirmed gender identity as disruptive, and practices such as requiring them to use locker rooms and bathrooms that correspond to their gender assigned at birth discourage participation. However, school leaders are becoming increasingly aware of their responsibilities to ensure that transgender athletes have access to athletic teams according to their affirmed gender identity and that these students are safe in locker rooms and on the playing field.

Because state policies vary, a transgender student’s opportunity to participate on high school athletic teams may be determined by the state in which they live. A growing number of state
associations have enacted policies on the inclusion of transgender students on athletic teams (see Around the Nation map on page 9).

As is the case with all eligibility rules at the state association level, some of the policies developed at this point are more restrictive than others. In one state, students are required to undergo gender surgeries and take hormones. In other states, students are required to participate according to the gender identified on their birth certificate regardless of their affirmed gender identity.

Some states have adopted policies that allow students to participate according to their affirmed gender identity, but include additional eligibility criteria based on possible “gender related advantages” and requests for personal medical information. Some state athletic associations either suggest, but not require a single policy for all schools in the state or leave the determination of policy up to individual schools. Another policy notes that it is illegal to discriminate on the basis of gender identity, but leaves the determination of eligibility up to individual schools.

In several other states, transgender policies enable students to participate according to their affirmed gender identity and avoid other restrictive criteria for determining eligibility. These policies do not require students to undergo medical treatment in order to participate and do not require students to divulge personal medical information.

In states with more restrictive policies, there are four major concerns – usually related to transgender girls playing on girls teams. These concerns are: 1) transgender girls are really boys despite their affirmed gender identity as a girl; 2) fear that non-transgender boys will pretend to be girls to win championships or get more playing time on girls teams; 3) transgender girls pose a safety risk for non-transgender girls in some sports, like basketball or field hockey; and 4) transgender girls have a competitive advantage over non-transgender girls.

It is important for policy-makers to understand that transgender girls (who were assigned a male gender at birth) are not boys. Their consistent and affirmed gender identity as girls is as deep-seated as the gender identity of non-transgender girls. The belief that transgender girls are not “real” girls is sometimes expressed as a concern that allowing transgender girls to compete on girls teams displaces opportunities for “real” girls to participate.

The fear that non-transgender boys will pretend to be girls in order to “dominate” girls teams has never been an issue at any level of sport and should not be used as a justification to restrict the participation of transgender students. Most well-developed policies require that students who identify as transgender demonstrate a consistent female gender identity in everyday life verified by parents and/or health-care professionals. This requirement effectively eliminates the unlikely situation where a boy pretends to be a girl to play on a girls team.

Some sports leaders and parents express concerns that allowing transgender girls to participate on girls teams will pose a safety risk for non-transgender girls. This concern is based on an assumption that transgender girls are bigger, stronger and unable to exercise adequate body control resulting in an increased risk of injury to other participants. Though there are generalized
differences in post-pubescent male and female bodies, there are also large overlaps in height, weight and strength among biological boys and girls. Moreover, taller, bigger, stronger athletes compete against shorter, smaller, less strong athletes every day in girls and boys sports except in sports like wrestling where competition is organized according to weight.

Concern about maintaining “competitive equity” is one of the most often expressed reservations about transgender girls competing on girls teams. As with concerns about safety, several assumptions are embedded in this concern: That transgender girls are always more skilled, stronger and bigger than their non-transgender teammates and opponents. There is no research to support the contention that enabling a transgender girl to play on a girls team creates a competitive imbalance. In reality, the overlap in skill and performance in sports among biological males and females and the wide variance within each gender group are important considerations to remember in addressing concerns about competitive equity. Concerns about competitive equity also perpetuate a gender stereotype that assumes that anyone with a male body will outperform anyone with a female body. As girls and women take advantage of increased opportunities to participate in sports, performance gaps between girls and boys have decreased.

High school-based athletics programs are part of a broad educational curriculum and the focus should be on enabling participation – not restricting it – for all students. Adopting well-informed and inclusive policies for the participation of transgender athletes according to their affirmed gender identity is consistent with the educational values of equity and fairness for all students.

Overall guidelines for developing transgender inclusion policies in high school athletics include:

1. Be proactive, avoid crisis mode. Develop a policy before a transgender student wants to try out for a team.

2. Talk to state athletic association leaders in the states that have adopted policies about how they have implemented their policies.

5. Always build in protections for student privacy into policy.

6. Educate school athletic administrators, coaches, parents and community about transgender students in athletics and policy.

* Trans* Athlete. [www.transathlete.com](http://www.transathlete.com)

HUNTSVILLE, Ala. — The parents of three Huntsville High School female students have filed a federal lawsuit against the Huntsville City Schools alleging gender discrimination in how the school system funds and supports athletics.

The lawsuit was filed Oct. 28. It alleges the three students, a freshman and two sophomores, are being deprived of equal benefits in school-sponsored athletics.

Read the lawsuit by clicking here

“Plaintiffs seek injunctive relief which, among other things, requires that defendants provide plaintiffs’ daughters with treatment and benefits equivalent to that provided to the boys’ athletic teams at Huntsville City Schools,” according to the lawsuit.

The plaintiffs, John and Karen White, Shawn and Lauren Anderson, and John G. Smith, filed the lawsuit on behalf of their minor daughters.

Alleged Title IX violations are the basis of the complaint.

Title IX is part of federal law and is aimed at preventing education discrimination on the basis of gender. The 1973 law has led to sweeping changes across the U.S. in terms of funding for women’s high school and collegiate athletics.

The lawsuit says the defendants have discriminated against the plaintiffs’ daughters in: athletics funding; provision of equipment and supplies; scheduling of games and practice times; travel and per diem allowances; opportunities to receive coaching; provision of locker rooms and facilities for practices and games; training and medical facilities and provision of publicity.

According to the filing, plaintiffs say their daughters and softball players are discriminated against because there are less funds available to them compared to boys’ sports and less off-season training and pre-game meals for girls as opposed to boys. It also mentions a mobile batting cage and other equipment the boys get that the girls do not.

The lawsuit states that the softball facilities are subpar when compared to the baseball facilities. It mentions the girls’ softball locker area that is “an old trailer” without running water, a coaches’ office, tv, or working lights. It also says the field has less lighting and isn’t fully enclosed, without secure storage space.

The lawsuit was filed by the Tennessee-based Schiller law firm, which specializes in Title IX cases.

Huntsville City Schools issued this statement Monday evening:

“We always intend to follow Title IX and other statutes. We have not had an opportunity to review this complaint. When we do, we will respond.”
ELIGIBILITY OF TRANSGENDER STUDENT-ATHLETES

The MHSAA does not prohibit girls from participating on boys teams. Therefore, the MHSAA will not be involved in matters involving trans male (female to male) student-athletes.

When questions arise involving trans female (male to female) student-athletes, the MHSAA executive director will determine eligibility for MHSAA tournaments on a case-by-case basis after being provided at least 30 days prior to the opt-out due date for that tournament, by the administration of the school for which the student seeks to participate, documentation that answers the following questions:

1. What gender is recorded on these school documents for this student?
   a. High school registration
   b. High school transcript
   c. Health/immunization records
   d. Preparticipation physical examination form

2. What do this student’s other records indicate?
   a. Medical
   b. Psychological
   c. If applicable,
      (1) Driver’s license
      (2) Voter registration
      (3) Selective service
      (4) Social Security

3. Has the student commenced . . .
   a. Testosterone supression therapy? (If so, when?)
   b. Gender-reassignment surgery? (If so, when?)

The MHSAA discourages submission of documents providing medical or psychological information that is unrelated to a student’s gender identity and/or transgender transition.

The MHSAA will require the petitioner if 18, or parent/guardian if not, to sign a waiver which states: “I hereby give my consent for the above student to engage in interscholastic athletics and for the disclosure to the MHSAA of information otherwise protected by FERPA, HIPAA or Michigan law, including but not limited to medical and mental health records, for the purpose of determining eligibility for interscholastic athletics under any one or more of MHSAA’s regulations.”
Guidelines for Creating Policies for Transgender Children in Recreational Sports

All children deserve the opportunity to play recreational sports. This publication provides basic information about how athletic associations and teams can create policies that welcome all children, including transgender children. This document specifically addresses policies appropriate for transgender children prior to adolescence.

Transgender Children

Medical experts recognize that attempting to change the gender identity of a transgender child is harmful and counterproductive. Based on current medical knowledge and practice, many more parents are supporting their transgender children and allowing them to be themselves while still in childhood.

Gender Transition for Transgender Children

The recommended medical treatment for transgender children is to allow them to live in their affirmed gender. This requires that the child’s gender identity be respected and accepted by others. It is imperative for the health and well being of children with this complex medical condition that they be allowed to live fully in the appropriate gender role in all aspects of their lives, including when participating in social activities such as sports. Transgender children should be called by their preferred name, be referred to by gender-appropriate pronouns, and be permitted to wear clothing and uniforms that match their affirmed gender. Medical treatments such as hormones and surgery are not appropriate medical treatment for transgender children prior to adolescence.
Transgender Children Should Be Allowed to Play Sports in Their Affirmed Gender

All young people should have the opportunity to play recreational sports and have their personal dignity respected. Transgender young people are no different. In fact, because transgender young people often must overcome significant stigma and challenges, it would be particularly harmful to exclude them from the significant physical, mental and social benefits that young people gain by playing recreational sports. The impact of such discrimination can be severe and can cause lifelong harm. In contrast, permitting transgender children and youth to participate in recreational sports in their affirmed gender can provide an enormous boost to their self-confidence and self-esteem and provide them with positive experiences that will help them in all other areas of their lives.

Is It Fair to Allow Transgender Children to Compete in Their Affirmed Gender?

Gender segregation in sports is based, in part, on a concern about unfair physical advantages. Most existing policies for adult transgender athletes focus on the competitive advantage that male hormones may provide due to their effect on the musculoskeletal system. Those policies require that adult transgender athletes compete in the gender role consistent with their hormonal make-up. In preadolescent children, however, hormonal levels do not differ significantly between the sexes. Therefore, no hormonally-based advantage or disadvantage between girls and boys exists. Prior to puberty, boys do not have any physical advantages over girls because of their physiology. Gender segregation in children's sports is purely social. It is not based on any significant physiological differences.

From a medical and physiological perspective, there is nothing about being transgender that gives any particular child a physical advantage over others. Because of gender stereotypes, boys may have social advantages based on being encouraged more than girls to be physically daring and adventurous and to play sports, but they do not have any inherent physical advantages. The individual variation with respect to athletic ability within each gender is much more
significant than any group differences between boys and girls. Transgender children display the same individual variation in size, strength, and athletic ability as other youth. There is no reason based on considerations of fairness that would justify preventing a young person who is transgender from playing sports in the child’s affirmed gender.

Why Shouldn’t Children's Recreational Sports Adopt the Same Standards Used by the Olympics and Some Professional Sporting Leagues?

Guidelines developed for adult transgender athletes cannot be applied to children. The International Olympic Committee and some professional sporting leagues require transgender athletes to undergo hormone therapy and genital reconstructive surgery in order to compete. As explained above, children who are transgender do not undergo medical treatment other than living in their affirmed gender role. Requiring medical treatments such as hormone therapy or surgeries before permitting a young child to participate in sports in their affirmed gender role would exclude them from participation, since young children cannot receive such treatments prior to the onset of puberty. Therefore, recreational leagues for children must develop age-specific policies to ensure that all children have equal access to sports.

A national think tank including high school and NCAA athletic officials and other experts is convening in October 2009 to create model policies for the inclusion of transgender athletes of all ages. Those model policies will be distributed to athletic associations nationally to provide guidance about how to adopt age-appropriate policies in recreational and school-based sports. Until that time, our

recommendation for an interim policy for transgender children in recreational sports is as follows:

A transgender child should be allowed to play on the team of the child’s full time gender role. To qualify for such participation, the family must submit a letter from either the child’s therapist or doctor stating the child’s diagnosis and confirming the child’s gender identity.

**Medical Confidentiality**

An athlete’s transgender status is confidential medical information. Therefore, it is not permissible or legal for this status to be communicated to anyone without the written permission of the family. Refusing to allow a transgender child to fully participate on the team that matches the child’s gender presentation and gender identity may result in the unlawful disclosure of private protected information. Unnecessary disclosure of a child’s personal and medical history to any third parties (such as other team members, parents, or members of the public) without consent may violate rights to privacy under state and federal law.\(^2\)

**Other Legal Considerations**

Prohibiting children from playing on recreational teams consistent with their gender identity may also violate laws and policies that prohibit sex, gender identity and disability discrimination.

**Sex discrimination**: Refusing to respect a child's gender identity may constitute prohibited sex discrimination under Title IX, public accommodation laws, or league non-discrimination policies. Title IX prohibits sex discrimination in publicly funded schools. Many federal and state courts have held that discrimination on the basis of an individual’s transgender status constitutes unlawful sex

discrimination. In addition, in many states, courts and administrative agencies have held that recreational sporting leagues are subject to laws barring sex discrimination in public accommodations. Federal courts have likewise held that sporting leagues are public accommodations for purposes of federal law.

**Gender identity discrimination:** Furthermore, a growing number of state and local jurisdictions have also adopted laws that specifically prohibit discrimination on the basis of gender identity in public accommodations and/or schools.\(^6\)

**Disability discrimination:** Failure to accommodate transgender athletes may also violate state disability laws. Several state courts and agencies have held that gender identity disorder (GID) is a disability. Therefore, failure to provide a reasonable accommodation to children with GID is unlawful.\(^7\) In one case, for example, a state court held that refusing to permit a transgender child to attend school as a girl and be treated as a girl in all respects discriminated on the basis of disability because forcing her to come to school as a boy “would endanger her psychiatric health.”\(^8\)

---

\(^6\) At present, states with specific protections for transgender children in schools or public accommodations include California, Colorado, Hawaii, Illinois, Iowa, Maine, Maryland, Minnesota, New Jersey, New Mexico, Oregon, Rhode Island, Vermont, Washington and the District of Columbia. More than one hundred municipalities around the country also prohibit gender identity discrimination, including, for example, Atlanta, GA, Bloomington, IN, Broward County, FL, El Paso, TX, Jefferson County, KY, Kansas City, MO, and Scranton, PA. For a list of all municipalities that prohibit gender identity discrimination, see Transgender Law & Policy Institute & The National Gay and Lesbian Task Force, Scope of Explicitly Transgender-Inclusive Anti-Discrimination Laws, http://www.thetaskforce.org/downloads/reports/fact_sheets/TI_antidisc_laws_7_08.pdf.

**Glossary of Terms**

**Affirmed gender:** the gender that corresponds with a transgender child's gender identity and desired gender presentation, rather than the child's biological sex.

**Gender identity:** a person's internalized, deeply felt sense of being male or female, which may differ from the person’s biological sex. Because gender identity is internal and personally defined, it is not visible to others, but is determined by the individual alone. Most people have an early sense of their gender identity, and if it is not consistent with their anatomical sex they may begin expressing this identity between the ages of two and four.

**Gender presentation:** the way we express our gender to others, such as through clothing, hairstyles, mannerisms, how we speak, how we play, and our social interactions and roles.

**Transgender:** refers to persons whose gender identity does not match their birth sex. For example, a child who self-identifies as a girl but is biologically male.

**Transition:** when a person changes outwardly from one gender to another and lives in accordance with their gender identity.
