The Power of Student Involved in Activities....Lessons for a lifetime!

Why student that are involved in sports and activities make for better future citizens. How schools activities are just as important as any classroom activity – an extension of the classroom. Education based activities teach real life skills like:

- Camaraderie
- Flexibility
- Adaptability
- Productivity
- Accountability
- Leadership
- Responsibility
Why School Administrators & Coaches Make a Difference

The impact school leaders can make in the lives of young men and women. Kids are crying for people that will:

- Tell them that they care and love them
- Will set high expectations for them
- Will fill the void they may have in their lives – a positive role model
ACTIVITIES SUPPORT THE ACADEMIC MISSION OF SCHOOLS. They are not a diversion, but rather an extension of a good educational program. Students who participate in activity programs tend to have higher grade-point averages, better attendance records, lower dropout rates and fewer discipline problems than students generally.
ACTIVITIES ARE INHERENTLY EDUCATIONAL. Activity programs provide valuable lessons for many practical situations. Through participation in activity programs, students learn teamwork, sportsmanship, winning and losing, the rewards of hard work, self-discipline, build self-confidence, and develop skills to handle competitive situations. These are qualities the public expects schools to produce in students so they become responsible adults and productive citizens.
ACTIVITIES FOSTER SUCCESS IN LATER LIFE. Participation in high school activities is often a predictor of later success - in college, a career, and becoming a contributing member of society.
